San Francisco Bay Area, CA

[Linked-in Profile](#)

elisa.widjaja@gmail.com | (415) 812-4179

Summary

Product Design Lead with deep expertise in designing and scaling complex platform ecosystems. Proven record leading cross-functional initiatives that bridge user needs, technical systems, and business goals. Experienced in design systems, AI-driven experiences, and end-to-end workflow simplification.

Professional Experience

Autodesk

Product Design Lead

Mar 2018 – Present | San Francisco Bay Area

- **Defined the north star vision** and strategy for Autodesk's next-generation App Store ecosystem, aligning business, user, and technical goals to enable growth and monetization.
- **Led end-to-end design for complex workflows** supporting both customers and third-party developers, improving publishing, purchasing, and license management experiences.
- **Created design frameworks and pattern libraries** adopted across multiple product teams to ensure consistency and scalability.
- **Facilitated cross-organizational workshops** to align stakeholders and drive consensus around ecosystem design principles and roadmap.

GE Digital

Staff UX Visual Designer

May 2014 – Mar 2018 | San Ramon, CA

- Delivered complex enterprise applications for GE's Power, Transportation, and Aviation business
- Contributed design pattern to Predix UI (GE Design System)

Razorfish

Senior Art Director

2010 – 2014 | San Francisco, CA

- Led the design of large-scale enterprise and consumer-facing applications across industries, including healthcare and finance
- Collaborated on multi-channel strategies integrating web, mobile, and emerging technologies
- Delivered high-quality prototypes, wireframes, and specifications for development teams
